SALVADORA BOTANICS
Message from Founder

The history of Datun has been traced since ancient time. Our ancestors have been using natural Datun since ages but in this modern time use of Datun has been lost. Ancient Ayurvedic texts such as Charaka Samhita and Sushruta Samhita mention the use of medicinal plant twigs for cleaning teeth and maintaining oral health. Datun is a traditional herbal oral care solution made from select medicinal plant twigs, rooted in Ayurveda and valued for its natural, chemical-free benefits. Salvadora Botanics offers premium, responsibly sourced Datun that blends time-honored wisdom with modern wellness needs. Each Datun stick is carefully selected, cleaned, trimmed, and quality-checked to ensure strength, hygiene, and consistency. Ideal for daily morning oral care, it suits those seeking a natural, eco-conscious, plant-based alternative to conventional products.

Brand Commitment

At Salvadora Botanics, we are committed to preserve traditional knowledge while delivering reliable, high-quality botanical products. Our Datun range reflects our values of purity, sustainability, and responsible innovation in natural oral care.
